ashwin.mk.2025@mm.smu.edu.sg | +65 9166 7345 | linkedin.com/in/ashwin-mahesh27

Product professional with nearly 3 years of experience delivering digital products and workflow improvements across healthcare technology and digital orthodontics. Experienced across user discovery, workflow design, requirements definition, prioritisation, cross-functional delivery, UAT and product release. Seeking Product Manager / Associate Product Manager internships in digital products and technology-enabled businesses.

CORE CAPABILITIES

Product Discovery and Delivery: User research, workflow mapping, requirements, user stories, prioritisation, UAT and release.

Analytics and Commercial Impact: Product metrics, KPI tracking, product adoption, competitor analysis, business reviews and commercial performance analysis.

Cross Functional Product Leadership: Engineering, design, sales, marketing and operations collaboration; stakeholder alignment and launch enablement.

PROFESSIONAL EXPERIENCE

Junior Product Manager

Jun 2025 - Dec 2025

CareRevenue - Dental revenue-cycle-management technology company | Trivandrum, India

- Improved insurance-verification automation by shadowing frontline agents, translating pain points into engineering requirements, and supporting testing, deployment and ongoing optimisation; reduced agent verification time by a reported 40-45%.
- Delivered a phased Accounts Posting workflow across Excel, an internal platform and a practice-management system; mapped workflows, refined requirements, led UAT and supported deployment, increasing daily throughput from ~25 to 40+ tickets.
- Improved payment-reconciliation reporting by defining receipt-to-deposit data relationships for analytics teams, reducing a 100-entry reconciliation task from 3-4 days to 1.5-2 days.

Associate Product Manager

May 2024 - Feb 2025

OrthoFX - Digital orthodontics / clear-aligner technology company | Bengaluru, India

- Led redesign of the doctor-onboarding journey through sales-representative interviews, workflow mapping and engineering prioritisation; removed a contract-stage blocker, reducing case-initiation lead time from 2-3 weeks to 2-3 days.
- Owned requirements, backlog refinement, testing, stakeholder sign-off and release for a three-phase Business Review dashboard used by sales representatives and doctors; completed cases increased from ~300-310 to ~340-345 per quarter following launch.
- Designed and launched the Rescue Aligner ordering workflow for paid correction aligners, partnering with marketing on pricing, engineering on requirements, and L&D on customer enablement.
- Analysed product portfolio performance and market opportunities to support leadership evaluation of Aligner Materials as a strategic growth area.
- Analysed product adoption and loyalty-program visibility to identify opportunities to improve engagement and repeat usage.
- Contributed to regional sales initiatives as part of the team that introduced OrthoFX sales in India.

Product Analyst

Nov 2022 - Apr 2024

OrthoFX - Digital orthodontics / clear-aligner technology company | Bengaluru, India

- Analysed backend data to identify case-completion blockers on a dentist collaboration platform, informing workflow and UI/UX improvements associated with 10-15 additional completed cases per quarter.
- Gathered requirements and led UAT and release for a patient-record upload redesign, consolidating multiple confusing user paths into preference-based configurations and a simpler interface.
- Supported internal and customer product adoption through demos and training for Sales and Customer Support teams, GTM materials and customer-facing enablement.
